Water WAT-902B

1/2" Ultra Compact B/W Camera One of the smallest and lightest CCTV box cameras available on the market. Yet it features a 1/2" CCD sensor, auto iris function and a full complement of electronic

controls. Working in concert, these allow the camera to produce visible images in light levels down to 0.003 lux. This level of low light sensitivity coupled with its incredibly small size makes it the camera of choice for commercial applications looking for dependable yet minimally intrusive round-the-clock security monitoring. Fatures simultaneous dual-band 802.11ac Wi-Fi support. With three-stream BD2.11ac technology, the 8ase Station can reach data rates of up to 1.3Gbps, which is triple the 802.11n standard. If you're using a 802.11a/b/g/n WI-Fi device, Airport Extreme can still optimize the connection for those Wi-Fi standards as well, There are three antennas for 2.4GHz and three antennas for 5GHz. Convertible Multi-Touch Tablet PC Encased in a magnesium alloy chassis and featuring a shock-mounted flex-connect hard drive, the "Fully-

Rugged" TDUGHBODK 19 can withstand drops up to 6'. The Multi-Touch display can be used as a conventional notebook screen, or it can be swiveled and laid flat to emulate a tablet. In both configurations, the user can navigate using fingers, gloves, or included stylus, which improves handwriting and signature capture. When set up traditionally, the notebook is navigated by means of an 82-key standard keyboard and a pressure-sensitive touchgad with vertical scrolling support. The 10.1" LED-screen is capable of up to 6000 nit in direct sunlight and features TransflectivePlus and Panasonic CircuLumin technology. Astonishingly thin, these ultra portables are made possible through the use of a strong but light aluminum alloy shell with a unique 'soun' finish on polished surfaces. The artistry of the series draws inspiration from luxury timepieces, displaying sharp edges, an oversized keyboard and smartphone-like touchpad for added comfort, as well as reinforced hinges for extended longevity. feica Ultravid HD Series

They offer unparalleled image brightness and contrast, thanks to Leica's Fluorite-Ion lenses. These highly developed lenses further reduce chromatic aberrations, and produce high color fidelity. Specially coated prisms increase light transmission, allowing them to discern fine details in any low light situation. Die-cast, magnesium, rubber-armored body has industry's highest rating for shock resistance. They are nitrogen filled and watertight to 16.5 feet. Finally, painstaking attention to ergonomic detail results in a beautifully contoured binocular that fits perfectly in your hands.

Equivalent of Original Manufacturers Lithium-Ion Battery

Watson's lithium-ion batteries are virtually the same as the manufacturers original, but only about 70% of the cost. They can be charged or discharged at any time without developing memory effect. Don't wait for your one and only battery to charge, carry a spare and keep on shooting.

50mm f/1.2L USM

#CA50121 FF

ideal for low-light photography, the high-performance EF 50mm f/1.2L USM is a standard focal length optic featuring an ultra-large aperture for a narrow depth of field that produces a soft background blur. Its weatherresistant with lens coating and construction that are designed to minimize the ghosting and flare that frequently occur with DSLRs. to deliver superb image resolution and contrast

8-15mm f/4.0 L USM Fisheve

Delivers 180° diagonal angle of view images for all EOS SLRs. When used with fuil-frame cameras you can choose between a circular fisheye image or full-frame image by using the zoom. When used with EOS bodies featuring APS-C or APS-H sensors, the lens produces a more traditional, full frame fisheye view. A zoom-lock mechanism on the lens body allows the range to be limited to the focal length that ensures the best possible full-frame view without unsightly vignetting around the edge. (C48154)). 1349.00

24-70mm f/2.8L II USM

Super UD and two UD lens elements minimize chromatic aberration in the periphery at wideangle, as well as reducing color bluming around the edges of the subject. Dust sealed and water resistantant, while fluorine coatings on the front and rear lens reduce fingerprints and smearing. A circular 9-blade diaphragm gives beautiful, soft backgrounds. A zoom lock lever locks the zoom position at the wide end for safe transporting while attached to an EOS DSLR camera over the shoulder.

100mm f/2.8L Macro IS USM

Held to a higher level of resolving power and overall construction, this lens eatures Ortical Image Stabilization with up to 4-stops of shake control, and a refined Ultrasonic Motor (USM) for quicker and quieter auto-focusing with full-time manual override. It allows for a comfortable. shadow-free shooting distance between the front of the lens barrel and the subject with life-size (1:1) magnification. Optional extension tubes increase this magnification for exceptional close-up detail #CA10028LMIS

17-40mm f/4L USM

Delivers optical performance equal to similar fixed tocal length lenses, with silent, high-speed focusing. High-precision molded glass aspherical lens and two replica aspherical lenses achieve the extended zoom range, while also correcting for aberrations that arise during zooming. Super UD (ultra-low dispersion) glass element help eliminate color bleed along the edges of the subject and achieve high image contrast and resolution. #CA17404LEF.

70-200mm f/2.8L IS II USM

Incorporating Canon's second generation two-stage Image Stabilization technology, this telephoto zoom responds in as little as 0.5 seconds, while providing up to three stops of correction for carnera shake. Its AF system has been refined for better response time and tracking speed. And even the new B-blade circular aperture offers a more pleasing out-offocus image. Constructed to pro standards, this fast zoom is also highly resistant to dust and moisture.

SLT-A58

The SLT-A58 achieves the highest-level of auto focus speed for both still image and movie shooting. Unlike ordinary DSLR cameras, SLT cameras by Sony use Translucent Mirror technology that directs light onto the main image sensor as well as a separate autofocus sensor. This means that subjects stay sharply focused at all times as you compose scenes with the tilt-angle 2.7" 460k-dot Clear Photo LCO or through the high-resolution, high-contrast OLED Tru-Finder (FVF) with 1 440k-riot resolution. And with no moving mirror to slow you down, you'll enjoy non-stop live image preview during speedy burst shooting or while you're recording Full HO video. SLT-A58 features a 20.1 MP

- Exmor HO APS CMOS sensor, 8IONZ processor and wide sensitivity range of ISO 100 to 16000. Record Full HD 1920 x 1080 at 60i and 24p in the AVCHD v2.0 format or at 1080/30p in the MP4 format for uploading to the web.
- . Tele-zoom Continuous Advance Priority AE mode with a highspeed burst of 8 fps. . SteadyShot INSIDE is in-camera, so any compatible A-mount
- lens can be used in conjunction with the A58 to receive image stabilization benefits
- . Multi Frame noise reduction and Hand-held Twilight mode SLT-A58 with 18-55mm t/3.5-5.6 Zoom (SOSLTA58K).

. Pick from a palette of 15 artistic 'in-camera' treatments. like Toy Camera, Mono and Partial Color . Auto Object Framing judges what's in the scene - one person,

two people, even moving objects or macro subjects - tracking, framing and cropping the shot to create powerful, profession-

ally-framed compositions.

SLT-A99 Full-Frame 24.3MP Camera

35mm full frame camera equipped with Sony's translucent mirror technology, the SLT-A99 can shoot without the delay of a reflex mirror, plus its Dual Autofocus System continuously monitors and afters its focus in real time. 24.3MP full-frame Exmor CMOS sensor lets you capture high quality images in low-light. ISD range of 100 to 25600 with area-specific noise reduction lets you shoot at the higher end of that sensitivity range, 3.0" TruBlack LCO (1,228,000-dots) features Shot Result Preview, for previewing the effects of your camera's settings before the exposure is even captured. It is also able to tilt up to 180° vertically and can rotate up to 270° horizontally.

Tru-Finder Electronic Viewfinder features a 1,440K-dot resolution, 100% field of view, and a wide 31.9° viewing angle. DG Models Datimized for Digital SLR's

These are large aperture lenses with short minimum focusing distances and an abundance of peripheral illumination. While they are ideal lenses for digital SLR cameras, they are also suitable for traditional 35mm SLR's.

DC Models For Digital SLR's Daly

These lenses feature an image circle matched to the small sensor found in digital SLR cameras. This method results in a lens ideally suited to digital reproduction with the added bonus of reduced weight.

Manufactured from 100% closed-cell neoprene, offering protection from bumps, jars, and nicks, with a camouflage-pattern fabric cover. Lens Covers also provide a thermal barner, protecting your hands from cold lenses in lower temperatures. They are easy to install and remove, leaving no residue on the lens. Moving a big white (or black) lens near skittish wildlife is like waving your arms - a sure way to flush your subject and ruin what could be a once-in-a-lifetime photo opportunity.

FORMATT Blender Filters e HITECH

Whether trying to affect color change or enhance a mood, 8lenders give you the edge you need. Ideal for outdoor, scenic or architectural photonraphy. 8lenders resemble traditional graduated filters except that they are

colored on top with a gradual transi-

tion to more subtle at the bottom. Graduated filters transition somewhere in the middle of the fitter Neutral Density filters have several uses and offer the possibility to achieve otherwise unachievable results. They enable the shooter to adjust exposure without affecting color balance. Available in 77mm-95mm in 0.3, D.6, D.9 and 1.2 densities.

HITECH Night Filter Achieve an evening effect without the added expense of shooting at night. It adds a bluish/lavender effect of low contrast quality. This filter can be a real time and

money-saver since it negates having to retain an entire crew on overtime when the sun is down, it also creates an unusual effect slightly different from traditional filming at night.

Some detail will be obscured but the overall night effect is quite pleasing and effective.

FORMATT Multistop Fader Filter HITECH

High quality, cost-effective and efficient way to control neutral density effects. This filter is effective when shooting under bright light conditions when you are using high speed ISOs. By rotating the ring on the filter, you can control your exposure up to 8 stops.

Neutral density filters appear gray and have no effect on color although Formatt does not recommend using it above 5 stons where some color cast may be present. This filter is especially valuable to nature and portrait photographers who need control over their depth of field.

FORMATT Graduated ND HD HITECH Filtors

Formatt Graduated Neutral Density HD filters enable you to adjust exposure without affecting color by 1 (ND.3), 2 (ND.6), 3 (ND.6) or 4 (ND1.2) stops to suit individual situations. Also comes in soft or

Soft Edge -half clear, half colored with a smooth transition to full density. Generally used with medium to wide angle lenses Hard Edge - half clear, half colored with a definite less subtle transition. For use with long focal length lenses.

cokin

Cokin universal filter holder system allows you to use one of 16D different filters on many different-sized lenses. The filter holder is the key to the system, it is attached to the lens by the adapter ring and takes specially designed round or square filters. There are 4 different series in the Cokin System:

- "A" Series for lens diameters from 36mm to 62mm "P" Series for 48mm to 82mm • "7-PRO" Series for 49mm to 96mm
 - · X-PRD Series for up 118mm

Cokin filters are manufactured from CR-39 organic glass which are extra lightweight. They are also highly resistant to shocks, meaning that photographers, videographers and cameramen can handle them in complete confidence and safety. Excellent optical transmission and high compatibility to coloring, make Cokin filters the proven choice of photographers worldwide.

Kaesemann-type filters feature greater optical efficiency than regular polarizing foils and are more neutral In color. The polarizing foils are cemented between plano-parallel optical glass layers, which are then precision-polished to achieve the most accurate plano-parallel surface.

This edge sealing protects the filter layers from humidity and are ideal for use with high-speed telephoto and APO lenses, XS-Pro is for DSLR use with wide angle and zoom lenses. Filter ring is made from brass for durability as well as iamming prevention

Available in 49 to 82mm, starting at 89.95

B+W 701/702 Graduated ND Filters

These filters help darken skies and other bright areas of the image. The filter is densest at the edge and abruptly fades to clear by the middle of the filter. A rotating mount allows precise positioning of the grad line along the horizon line. Neutral density filters do not affect the coloration of

the image, Te 701 (0.3 density) provides a 1-stop, the 702 (0.6) a 2-stop reduction in the light entering the lens, Multi-Resistant Coating (MRC) helps to increase light transmission by reducing reflections, scattered light, and ghosting.

B+W UV Black (403) Filter

Specialized filter used to block visible light while allowing UV A radiation (320-385nm) to pass through. This filter differs significantly to the more well known UV filter, which does the opposite by blocking UV radiation. The filter visibly appears completely black and is used in for

applications such as forensic Depending on the illumination and materials being used, the filter

13+W/ UV 415 Strong Absorbing Filter

Specialized filter for blocking UV radiation up to the limit of visible light. Prevents unsharpness during photography caused by chromatic aberrations due to intense UV lighting situations. Also compensates for the bluish cast of daylight like clear UV filters. It has a filter factor of 1 and requires no additional ex-

posure compensation for normal results

Available in 37 to 77mm filter sizes, starting at

B+W IR Dark Red (092) Filter

Used for infrared photography, this nearly coaque filter blocks all visible light up to 650nm, lets 50% of radiation pass between 650 and 700nm. and more than 90% of radiation pass between 730 and 2000nm. Infrared film sensitivity is rarely oreater than 1000nm, so this filter essentially allows most perceivable infrared radiation to be transmitted. The filter factor for this filter is highly variable and

Blocks the entire visible spectrum, so to your eyes it looks completely opaque. Unlike the B&W 092 Infrared fifter, it makes nure infrared photographs possible without the visible red component. This filter uses 8+W's F-Pro mount. It also uses an enhanced retaining ring that holds the filter in place from the rear of the filter. This eliminates any chance of damaging the filter from a tight lens hood or additional filter.

B+W Close-up Lenses

Close-up lenses let you decrease the minimum focus distance on any lens, in turn increasing the effective maximum reproduction ratio of your lens. You can also combine close-up lenses to increase their strength and to fine tune your close-up settings

Compared to extension tubes,

close-up lenses are lighter, smaller and less expensive. They also offer clearly better image quality that can be achieved at reproduction ratios of up to 1:2.5.

3D Printing Pen with ABS Filament

Extrudes heated plastic, which quickly cools and solidifies into a stable structure. Suitable for both right-and left-handed use, the pen can be used to draw flat forms on paper that can be peeled off, or it can draw 3D objects in mid-air. You can also use it to decorate and personalize items, weld together traditionally-printed 3D objects, or repair small plastic items. Compatible with ABS or PLA filaments, two

buttons allow you to control the speed at which the plastic is extruded, which will affect the thickness and properties of the resulting doodle. A mounting bracket built into the back of the pen allows you to connect it to a CNC arm with optional 3mm screws. #30000V1AB2US...

TOBE 3D R1 3D Printer

Print objects up to 10 x 9 x B* from a variety of materials, including both PLA and ARS plastics. The versatile R1 can also be used with almost any onen-source software, variety of resolution settings, and most current operating systems. The single extruder allows you to print with one material at a time. The build plate is calibrated automatically, leaving no room for human error. It is also heated, a quality that prevents the bottom of your print from warping, which is an essential factor in printing with

ABS plastic. The R1 can also work with glass, wood, and flexible filaments. The R1 is engineered to print at three levels of detail - set it to high resolution to achieve prints comprised of 100-micron thin layers, or set it to low resolution to print faster, rougher prints with 300-micron layers. Design your object with almost any kind of CAD software, and send it to the printer via USB cable, or save your file onto an SD card and plug it directly into the R1. (RDRDBDR1001)... 799.99

Sense 3D Scanner

3-YearService Plan for Replicator Z1B (MAMP06587)

Portable, three-dimensional scanner for quickly and easily creating 3D models of real-world objects. It has a wide scan volume from small B x B x B" items up to 11B x 11B x 11B" objects. The Sense also has a working distance of 15 to 60". Sense has two front cameras, one is for capturing the shape and size information while the second is solely for color. This helps to

create accurate models perfect for 3D printing. For general operation, the scanner sends a 30 frame per second image stream over the 7" USB 3.0/2.0 cable to a Windows 7- or B-based computer. The computer then processes the information to create a 3D model. This can then be enhanced and edited with

the use of the specialized software to create printable models. 399.00

Digitizer Desktop 3D Scanner

Scan 3D objects and import the 3D file to your computer. When you have digitized the 3D model you want to work with, you can modify,

multiply, improve, and share it for 3D printing. Using MultiScan.

technology, Digitizer allows you to scan objects from multiple angles to capture the top, bottom, and even the hidden parts of your 3D object. With up to 200,000 triangles on a single 3D object, you can also "merge" all the different angles into one 3D model for improved accuracy. MakerWare for Digitizer contains an algorithm that connects hundreds of thousands of points into a seamless digital mesh in just seconds. There's no patching, stitching, or repairing required, so you can skip straight to your creative process. Digitizer is optimized to work with MakerBot Replicator 3D printers, MakerBot MakerWare, and Thingiverse. #MAMP/13055

Pro-10 (10-Color)

Utilizes a 10-ink tank system with LUCIA pigment-based inks to produce a wide color gamut and exceptional print longevity on fine art and glossy paper. The printer employs three monochrome inks, including Matte Black, to generate deep, dark blacks when using fine art paper. The addition of Chroma Optimizer to the ink system. further improves print quality by enhancing the black density when printing on glossy media types.

Pro-100 (8-Color)

The eight-color, PIXIMA PRO-100 utilizes the ChromaLife 100+ dvebased ink system to produce vibrant, saturated colors on fine art and glossy papers. Eight separate ink channels offer a level of color fidelity rivaling that of positive films. Subtle areas-particularly in areas of low chromaticity- are reproduced with proof-standard accuracy. Three monochrome inks are included to enhance black density and produce accurate prints with smooth tonal gradations. #CAPP100

materials have been brought to the digital age. The result is the Hahnemuhle collection of Digital Fine Art papers. Designed for discerning users, these grades of Digital Fine Art paper can be used to create limited editions, glolees, original digital art, traditional output, photographic and historic photographs on a choice of paper textures, multiple colors and a huge variety of sheet sizes and weights. These are available in cut sheet sizes of A4, A3, A2 and are compatible with all inkjet printers up to a resolution of 1440 dpi, while printers that feed flat from the bottom and bending the paper up round only being recommended up to 210 gsm. The papers work equally well with both dye and pigmented based inks on a wide variety of printers providing a color intensity and crispness not possible with non-coated art papers. The Hahnemuhle collection is manufactured in the traditional mould-made and fourdrinier techniques that artists value for its unique rich look, feel and texture. Surface coating in combination with the traditional paper base and the right inks will produce sharp, high resolution output with the warmth and quality of the hand generated artwork. In many cases it is difficult to identify the original with the copy.

The Hahnemuhle paper mill has been producing quality mould made artists papers for over 400 years. Now that tradition of excellence in art

PICO DOLLY Pico Dolly

Slidecam V-1000 Camera Slider AWV1000).

Camera Table Dolly Capture dynamic shots with small camcorders or DSLRs. Perfect for table-top use or low-angle shots, the Pico Dolly makes otherwise static shots compelling: smooth motion. Can move straight, along broad curves, or in complete circles for 360° shots. Its wheels resemble those of inline skates, and high-quality trall bearings ensure that your shots are carried off smoothly - without a hitch.

Simultalk 24G Full-Duplex Wireless Intercom with Slimline Headsets

Ideal for production work or houses of worship, the Simultalk 24G is a wireless intercom system that enables two people to communicate freely in real-time, without having to push a button to talk, and without having to wart for the other person to stop talking before they respond. Supplied singlesided Slimline headsets are preferred by video camera operators (dual-sided headsets tend to get

in the way when the video camera is mounted on the operator's shoulder). More people can be added to the Simultalk 24G system	with the
purchase of additional belt-packs and Eartec headsets. (EASLT24G2SS)	369.25

Optical Big Bottom provides low-frequency punch, without the unwanted level boost that comes from increasing low-end EQ. Benefits are deeper, more resonant, detailed bass with tighter articulation, extending the low frequency spectrum for a richer, more percussive sound, even at very low volume levels.
